

Licence For The Free Use Of Little Fish Products, Graphics And Tools

Importance Of The Free Flow Of Information

We, at Little Fish, believe that the free and transparent flow of information is very important. In the light of this, the company is making a selection of its core products, graphics and tools free to use.

Definition - From here on all products, graphics & tools owned by Little Fish are called materials.

Conditions For Downloading

By entering your details on the Little Fish web site and downloading these materials you accept the terms and conditions of this free licence.

Conditions Of Free Use

You may make free use of these materials, provided that: -

If you are an individual:

you agree to the following: -

If you represent a company or an organisation:

you acknowledge that you are authorized, on behalf of your company/organization, to agree to the following: -

- That Little Fish retains all copyright, trademark rights, patent rights and other intellectual property rights associated with the materials downloaded.
- That whenever you display or use these materials, that you will ensure that the free licence box, Little Fish logos, copyright © marks, Trade Marks ® and any other identifying marks remain clearly visible. The free licence box always includes the text 'Little Fish' and indicates that the material is 'being used under our free licence agreement'.
- Whenever you use parts of these materials for more than quoting purposes, that this material is attributed to Little Fish in a clearly visible form and that the attribution includes the company name, full details of Little Fish's phone number, email address and country of head office - Australia.
- That you make no claim that you have been accredited by Little Fish in the use of these materials or have been accredited by Little Fish as a presenter of these materials, unless you have attended a Little Fish accreditation course relating to these materials and have been passed as competent to use/present these materials. Little Fish considers it very important to maintain the consistent high quality use of its materials guaranteed through an accreditation process.
